

## IFRA Certificate Module

The IFRA Standards set the boundaries on the use of fragrance materials. In particular, they ban the use of certain ingredients and impose a quantitative limit on the use of fragrance materials in the finished consumer product.

With the IFRA ExESS Module easily determine the safe use levels of fragrance compounds in a variety of consumer product types and generate the certificate to comply with the latest Amendment to the IFRA Standards.

## IFRA Key Features

### Automation

- ✔ Detection of ingredients subject to IFRA recommendations.
- ✔ Single or batch calculation of the maximal usage levels.
- ✔ Automatic detection of IFRA Standards present in your products database.

### Reporting

- ✔ Generation of the IFRA Certificate up to the 48th and to the 49th Amendment Standards also available in batch.
- ✔ Reporting for all IFRA Categories or for specific categories only.
- ✔ Reporting of name, CAS No and concentration of detected IFRA ingredients on the generated certificate.

## IFRA 49th Amendment Deadline

2021

**February 10, 2021** - Date of Standards entering into force for new creations.

2022

**February 25, 2022** - Date of Standards entering into force for existing creations.

> For Standards prohibiting or restricting the use of ingredients and for Standards introducing a specification on the use of a fragrance ingredient.

### Unique coverage of both the 48th and 49th Amendment Standards

To ensure a seamless and straightforward transition for all our customers our **IFRA Standards Certification Tool** covers both the 48th and 49th versions to allow our users to continue to generate IFRA certificates in the 48th format all the while preparing those for the 49th.

Continuous Conformity

Significant Time-Saving

Enhanced Productivity

Streamlined Approach

**Easily comply with the IFRA Standards and ensure product stewardship for all your fragrance products.**
